

Helmet Headset Harness Diagram

General Guide for MotoChello Headset Harness Installation

Use the helmet headset harness to connect helmet speakers, microphone and coiled headset connection cable together. The adhesive backing secures the position to the inside of your helmet under the foam liner. Snap connectors keep it simple.

Connect wires as listed

Yellow / White wires -
RIGHT ear

Black / Blue wires -
LEFT ear

Green / Red wires -
Microphone

Adhesive backing for
easy helmet install

Back with Tape

Disc with adhesive
backing attached to
helmet shell

Connect to Coiled Headset cable

WARNING: The harness connectors, while compact, have a firm hold. Should you need to disconnect them for any reason, it is strongly advised that you use needle nosed or small pliers on each end to pull apart. Otherwise, the connectors and/or wires may become damaged.

Should you need help installing your headset harness, please contact MotoChello support for assistance.
